Dear Neighbour,

We're Bringing Fibre to Fourth Line—With Your Support

Standard Broadband is excited to announce the potential expansion of our Fibre to the Home (FTTH) network to residents along Fourth Line, between 15 Side Road and Guelph Line.

We're reaching out to gauge interest and determine if there's enough community support to begin construction. While we understand that another provider has received government funding for a similar project in the area, it's our understanding that construction has yet to begin—and residents like you are still waiting for fast, reliable fibre-optic service.

Our Fiber To The Home network will provide access to the following Internet services.

FTTH 100Mbps	FTTH 250Mbps	FTTH 500Mbps
\$99.99/mo	\$129.99/mo	\$159.99/mo
<ul style="list-style-type: none">➤ 100Mbps Download➤ 100Mbps➤ Unlimited Bandwidth	<ul style="list-style-type: none">➤ 250Mbps Download➤ 250Mbps➤ Unlimited Bandwidth	<ul style="list-style-type: none">➤ 500Mbps Download➤ 500Mbps➤ Unlimited Bandwidth

Along with the Internet service we have a complete Television service that is also available on our Fibre To The Home network, complete details and packages are available at standardbroadband.ca/sbtv.

A one-time installation fee of \$299.99 would be charged and includes the onsite installation, cable required from the street to the home and the fibre modem.

To move forward with this project, we're looking for interest from 75% of the homes on Fourth Line, each willing to subscribe to one of our internet services with a 3-year commitment.

If you're interested, please visit standardbroadband.ca/fourthline and complete the form. This form is not a contract—it's simply a way for us to gauge community interest.

If we reach our goal by May 31, 2025, we'll contact everyone who expressed interest and begin the next steps. If we fall short, we'll reach out to those who did respond to discuss alternative options that may be available.

Tom Williams
